## 1. Background

The Catholic Health Initiatives (“Consortium”) is a consortium of hospitals, clinics, off-site administrative offices and data centers in more than twenty states. Consortium is seeking to strengthen the coordination and integration of its diverse system of healthcare providers by enhancing and modernizing its broadband network.

Currently, Consortium’s sites operate within regions that are dispersed over a wide geographic area. Each region operates semi-autonomously, making its own decisions regarding information technology and telecommunications. In the current network topology, sites within each region connect to a hub. Each of these networks is of unique design using multiple technologies, including MPLS, metro-Ethernet, frame relay, and point-to-point. In some cases, multiple network types are deployed within a single region.

While each site independently pursues Consortium’s overall goal of delivering the highest possible level of care, performance suffers because the regions are not always able to work together effectively. The lack of coordination hampers the organization both technologically and economically. Without a cohesive network design, distinct units may select different communications vendors, resulting in incompatible technologies or standards. Networks have varying levels of redundancy and diversity, determined primarily by fiscal constraints and availability in the marketplace.

Even when network connections are established the cost in terms of access leasing and personnel with the requisite network management skills can be prohibitive. The whole organization is not aggregating its broadband requirements to drive the best deals with carriers. Additionally the inconsistent and dispersed nature of the network may increase technical personnel requirements, further increasing costs.

The strategy to overcome the balkanization of Consortium’s sites is to implement a networking architecture that economically integrates sites regardless of size or location. Consortium envisions a network that will span multiple states where Consortium operates. The new network will take advantage of Consortium’s size, maximizing the number of interconnected nodes, thereby expanding the power of the network. The architecture design will take a total cost of ownership approach, ensuring that while costs locally may be higher, the overall network will deliver improved performance for the lowest possible cost.

The needs of the rural members of the consortium are unique; they may be hampered by a lack of specialist personnel, medical and technical, as well as limited access to affordable technologies to connect with experts that may reside in urban areas. The network could enhance the ability of underserved HCPs to connect to urban-based experts potentially through telemedicine and the easy transfer of electronic health records. Rural members will also be able to rely on centralized personnel and systems to maintain and ensure security of the network, freeing constrained resources to focus on care delivery. Finally, rural members will benefit from the group buying power of the consortium to realize lower prices than possible if procuring as an individual site.

The envisioned network should be able to accommodate each site’s unique needs, both as-is and in the future. Initially some rural sites may continue with existing broadband access technology, based on technology availability and application requirements. As the need grows, the network should be designed to accommodate the new requirements. In responding to the RFP, Vendors should anticipate scalability of the services as the need for services and service end points increase over time; growth will include both greater connectivity at current end points and the addition of new end points. The initial list of participating facilities is included as *Exhibit A*.

During the life of the contract that results from this RFP, other HCPs operated by Consortium may choose to purchase services from the contract. Vendors should pay careful attention to the Contract Modification section of this RFP for more information pertaining to the Consortium’s intention to utilize the site and service substitution flexibility allowed under the Healthcare Connect Fund rules.

All vendors are hereby provided notice that any contracts entered into through this RFP process are subject to Consortium obtaining funding through the Healthcare Connect Fund. If funding is not available, or if funding is denied due to no fault of the applicant, Consortium retains the right to renegotiate terms or terminate services awarded through this RFP.

The HCF requires that the successful Vendor obtain a Service Provider Identification Number (SPIN). This may be obtained from USAC at <http://www.usac.org/sp/default.aspx>. Please provide the Universal Service SPIN number of billing party/parties and indicate whether the billing party/parties have complied with all USAC requirements to participate in the Healthcare Connect Fund program.

It is anticipated that several vendors will be required to provide all of the components requested. Vendors are encouraged to make proposals on those parts of the project where they feel they can effectively provide a solution. Vendor proposals will be evaluated based on what the affected member determines to be the most “cost effective”<sup>1</sup> solution. Bid evaluation criteria is available in *Exhibit C*.

## 2. **Contact Instructions, Due Date and Competitive Bid Process**

Consortium is committed to complying with the FCC requirement that the competitive bidding process must be “fair and open.”<sup>2</sup> This means that vendors have to be treated equally and all vendors must have access to the same information. It is imperative that the vendors who wish to bid comply with the communication requirements outlined in the RFP.

All contact regarding this RFP shall be directed to:

Whittney Walker

Director of Telecom Funding Programs, Community Hospital Corporation

Consultant for Catholic Health Initiatives

[chctelecom@communityhospitalcorp.com](mailto:chctelecom@communityhospitalcorp.com)

CC to:

Maya Boyle

Service Delivery Manager - USAC Project Coordinator

Catholic Health Initiatives

Financial Analyst – USAC Project Coordinator

Catholic Health Initiatives

[marlenamurataj@catholichealth.net](mailto:marlenamurataj@catholichealth.net)

Consortium will receive bids for a period of 28 days from the time the RFP is posted. The following parameters apply to the submission process:

A letter signifying the Vendor’s intent to bid on this project must be received via e-mail no later than 14 days after this RFP was posted for bidding. Letter of intent e-mails should be sent to the Consultant with a CC to Project Coordinators with the following information: The name and address of your company; the company’s authorized representative’s name, title, address, phone number and e-mail address. In addition, please ensure the Subject Line includes “RHC 33823 RFP\_003-2020 – Multi-Year”. Only Vendors submitting such a notice will be eligible to send questions and receive answers concerning this RFP (“Eligible Vendors”).

Questions concerning this RFP should be submitted to the Consultant with a CC to Project Coordinators. Eligible Vendors are invited to submit written questions and/or requests for interpretation/consideration concerning this RFP. Consortium will reply to questions received within 15 days of the posting of the RFP. Replies will be given within 5 business days of receipt. All questions and responses will be shared with Eligible Vendors.

Any communications relating to the RFP response not sent via electronic mail will not be entertained, and communications with persons other than the Consultant with a CC to Project Coordinators regarding this RFP may, within Consortium's sole discretion, disqualify the Eligible Vendor.

All Vendors are required to complete and submit *Attachment A*. Any bids submitted in response to this

---

<sup>1</sup> Cost effective is defined in the HCF Order (54.642(c)) as “the method that costs the least after consideration of the features, quality of transmission, reliability, and other factors that the health care provider deems relevant to...choosing a method of providing the required health care services.”

<sup>2</sup> See, Healthcare Connect Fund Order, ¶ 229-233 and 47 C.F.R. § 54.603 and § 54.642.

RFP without the required attachment may, within Consortium's sole discretion, disqualify the Eligible Vendor.

In the event it becomes necessary for Consortium to amend, add to or delete any part of this RFP, the amendment will be posted on the USAC website, as required. All vendors that submit a Notice of Intent will also receive an email with the updated version of the RFP attached.

Consortium understands that the competitive bidding process must be “technology neutral” in order to comply with the Federal Communication Commission competitive bidding rules.<sup>3</sup> Nothing in this RFP is intended to undermine the competitive bidding requirements. Any technology specific information in this RFP is intended to be guidance only. Any vendor, regardless of the technology that the vendor uses to provide service, is welcome to submit a bid for this RFP. If the vendor cannot provide the specific technology requested (example: QoS) the vendor should respond with detailed information on exactly what equivalent service or equipment, the vendor can provide.

### **3. Healthcare Provider Requests**

As more thoroughly described in the Contract Modification section below, Consortium is interested in maintaining existing circuits but also in upgrading the broadband connections during the life of the contract. In some cases, Consortium will need to upgrade connections within the first year of the contract term. Vendors are asked to provide pricing at all locations listed on *Exhibit A* for the following broadband speeds: 1.5 Mbps, 5 Mbps, 10 Mbps, 20 Mbps, 25 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 200 Mbps, 250 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 1 Gbps, and 10 Gbps. While Consortium is asking for pricing for these specific broadband speeds, it no way limits Consortium to only upgrading to these specific broadband speeds when locations require an upgrade. It is possible that when specific locations require an upgrade, the upgrade requested will be to a speed not listed (i.e. 75 Mbps). The purpose is to obtain pricing for certain broadband speeds to empower Consortium with more information in preparation for upgrading broadband speeds during the term of the contract. As more fully described in the Conduit section below, the Vendor is required to disclose if the upgrade will require vendor-owned facilities upgrades. The Vendor is encouraged to disclose all “upfront costs” required to provide the requested broadband speed(s).

Telecommunication service options for end-user sites should reflect overall pricing, quality standards, and network-wide service requirements as described below. Bids must be responsive to service needs established by end-user healthcare providers/clinics in Exhibit A. High bandwidth fiber (or equivalent) connection within the Consortium broadband network is required, where available, to allow the Consortium sites to access specific software systems integral to provide patient care and allow the sites to interoperate with other health care providers in the Consortium network and beyond. Non-fiber options are requested when existing fiber facilities are not available. Vendors are encouraged to submit any solution they feel works best for the needs of the consortium.

The Consortium sites will connect via vendor-owned fiber (or equivalent) circuits, with routers and high capacity ports to accommodate the bandwidth needed for each site as defined. In cases where fiber is not available, the best next option available should be identified. Vendors responding should indicate if the facility is fiber, copper or wireless. Vendor must deliver connectivity over a private data network in a secure and prioritized fashion on an Internet Protocol (IP) platform. Vendor may be required to purchase local access from a local exchange carrier to complete last mile connectivity to nearest Point of Presence.

Vendor shall provide network services in a manner that meets HIPAA requirements concerning telecommunications.

Quality of Service – All access circuits and vendor’s core infrastructure network should be designed to deliver QoS, specifically DSCP (or equivalent technology) from end-to-end. Vendor will be required to prioritize traffic with QoS to ensure packet delivery and latency remains at or above industry standards for the routing protocols as well as for switching.

Any expense, whether bundled or unbundled, that will be charged by the vendor to Consortium for QoS or like-services must be clearly identified in the bid response.

---

<sup>3</sup> See, 47 C.F.R. § 54.603 and § 54.642.

Consortium recognizes that service providers are unable to determine if conduit from the nearest “handhold” to the HCP facility is required until the local service provider is able to complete a site survey. It is the intention of Consortium to seek funding from the Healthcare Connect Fund for “upfront costs” to pay for the required conduit.

Service providers are required to work with local contractors to install the required conduit from the nearest “handhold” to the HCP facility for the required bandwidth to be provisioned. The service provider is also required to bill the Consortium through its regular invoicing method for the cost of the conduit installation. Service providers are required to identify the HCPs that require conduit as early in the installation process as possible.

During the RFP response period, service providers are required identify the most likely HCPs to need conduit and provide a reasonable best guess estimate for the cost of the required conduit. Service providers are encouraged to communicate with contractors to obtain a quote that will provide it with a reasonable best guess estimate for the required conduit.

Consortium understands that service providers will bid based on the reasonable best guess estimate. However, Consortium has a reasonable expectation that service providers bidding on this RFP will perform the work necessary to obtain the absolute best possible estimate for the cost of the conduit build-out. Consortium expects that the estimates will be close to accurate once the site survey is complete and an actual cost for the conduit is provided. Consortium expects that expenses be within 110% of the reasonable best guess estimate. Expenses that are higher than 110% of the reasonable best guess estimate provided in the RFP will not be paid by Consortium and those costs will be absorbed by the service provider.

As a requirement, the vendor must be able to guarantee that the requested services are included in the Service Level Agreement (SLA) for each connection requested. If the parameters cannot be met after the point of implementation, Consortium reserves the right to terminate any and all contracts due to failure to meet service requirements.

1. Administrative network security policy and operational requirements for data transport that meets HIPPA security and privacy requirements of State and Federal regulations and statutes.
2. Support for standards-based encryption protocols.
3. Requirements defined for common technical standards and operational procedures to maintain system reliability, relevant parameters include:
  - a. An average end-to -end or end-to-hub site delay of less than (<) 20 milliseconds
  - b. Provide less than (<) 0.1% packet loss.
  - c. Provide less than (<) 20 millisecond jitter (delay variance).
  - d. Provide greater than (>) or equal to 99.99% network availability.

Proposed system testing and acceptance provisions will be required on all bid proposals. Consortium reserves the right to work in concert with vendors to develop appropriate test and acceptance criteria for a specific installation or configuration, to be defined and accepted by both parties prior to contract initiation. SLA will be included in the bandwidth evaluation.

It is recognized that vendors will have different levels of service that they can provide. Vendors should feel free to quote the service (even if not identical to what is in our request) they are in a position to deploy.

Vendors submitting proposals should describe their organization’s general approach to account management and the plan for ongoing account management relative to the Service Requested. In the event the vendor has an existing account management relationship with a participating Member listed within *Exhibit A*, describe in detail how account management relationships will change if awarded some or all of the Services in this RFP. *Please find detailed service requests in the attached Exhibit B – Service Costs.*

Vendor must provide details of all maintenance activities and how assistance will be provided to Consortium members. The data shall include, but not be limited to:

1. How 24/7 maintenance will be provided. The response times for major and minor problems.

Vendor shall provide the definition of what is a “minor” and a “major” problem.

2. How the service will be monitored on a continuous basis for any problems and what proactive steps will be taken to ensure the Quality of Service.
3. How reports will be made available to the consortium management online via the public Internet or through the newly created private Intranet.
4. Description of what software will be used to generate reports containing the following minimum information:
  - a. Circuit bandwidth utilization (private Intranet and public Internet)
  - b. Peak bandwidth analysis (private Intranet and public Internet)
  - c. Circuit up-time (private Intranet and public Internet)
  - d. Circuit down-time (private Intranet and public Internet)

#### 4. Pricing and Cost Information

Bid proposals should identify all costs in sufficient detail as to confirm the proposed solution and that the solution complies with Healthcare Connect Fund’s eligibility requirements. Bundled pricing may be cited, but individual components must be identified and detailed pricing provided.

All sub-contracting shall be pre-approved by the consortium. The primary vendor shall be responsible for all subcontractor’s work and payment. The consortium will not pay any subcontractor or third parties directly. Proof of release of liens of subcontractors will need to be submitted prior to invoice approval.

All vendors are hereby provided notice that the consortium is not financially responsible for line-item (i.e. unbundled) charges that are deemed ineligible if those line-item expenses are not disclosed in the vendor’s bid to this RFP. All ineligible expenses that are not disclosed in the vendor’s response to this RFP are the sole responsibility of the vendor.

Services requested through this RFP should be for one-year through five-year terms. Consortium will determine what term length is best for their situation after all bids evaluated. Vendors should also provide for one three-year optional renewal and one two-year optional renewal, for a total optional extension period of five years in the aggregate. Please take note: The contract term should be at the “consortium level”. To be specific, the contract term is required to be static. Consortium will not enter into a contract where the term is not static – meaning when a service is purchased, a new term begins. Vendors that propose a term that is at the “service level” will be evaluated accordingly.

Each responding vendor must submit pricing in an excel spreadsheet (.xlsx format) when submitting the bid response, as reflected in *Exhibit B*. Vendors must insert additional columns for line-item level cost associated with providing the service requested. The bidder with the lowest cost will receive the highest score for the cost evaluation for the specified criteria.

Vendors submitting proposals should identify all costs associated with the solution or subset solution that they are quoting. Not all of the costs associated with the solutions will necessarily qualify for HCF funds, and it is critical that Consortium and participants understand the complete cost of ownership. Bids must include the following:

- Implementation Fees, including any cost for required hardware for end to end connectivity
- Monthly recurring expenses
- Installation and/or engineering costs
- Tax/surcharges that will apply. For percentage based, provide the existing percentage. For flat-rate taxes/surcharges, provide the existing flat rate
- Any other costs associated with the solution and/or description of requirements that are pre-requisites for the solution that may add additional costs to Consortium

#### 5. Billing and Disbursement of Federal Funds

Consortium has certain invoicing requirements related to how it administratively manages the services provided, which are a result of administrative efficiencies and federal program requirements. As a result, Consortium has developed an invoicing methodology which each vendor must comply. When submitting bid proposals, the vendor must acknowledge that it is aware of and accepts the following invoicing requirements:

All goods or services provided will be invoiced directly to Consortium. Invoices must be sent to:

- Catholic Health Initiatives  
11045 E Lansing Circle  
Englewood, CO 80112

All invoices must also be sent via email to [chctelecom@communityhospitalcorp.com](mailto:chctelecom@communityhospitalcorp.com)

Invoices must delineate the charges by location as outlined on *Exhibit A*. Invoices must include the HCP number assigned by USAC for all charges associated with services provided at the physical location of that Consortium participant. Compliance with this requirement will allow for greater administrative ease for all parties involved in the invoicing process and will allow for faster processing of invoices. Compliance with this requirement will also enhance the filing process with USAC.

Once USAC has issued a Funding Commitment Letter, the parties can now initiate a request for disbursement from the universal service fund. In the Healthcare Connect Fund, the applicant initiates the disbursement process and the vendor completes the submission of the request to USAC. Vendors responding to this RFP must acknowledge understanding of the process and state that the Vendor will comply with the processing timeline outlined herein.

1. Vendor invoices Consortium as described in the “invoicing” section above. Consortium remits payment of the undiscounted portion to the vendor.
2. When Consortium remits payment of the non-discounted portion to the vendor, Consultant will simultaneously complete the FCC Form 463 seeking disbursement of the discounted portion of the vendor invoice. Consortium will endeavor to complete the FCC Form 463 as soon as possible after receipt of the vendor invoice.
3. Upon notification from USAC that the FCC Form 463 has been submitted by Consultant, the vendor shall review the submitted form within five (5) business days. If there are any errors on the Form 463, the vendor shall reject the Form 463 and provide notice to Consultant as to the errors that it believes are contained on the form. Providing notice to Consultant as to the errors will assist in allowing Consultant to correct the errors or to open a dialogue between the parties as to the suspected inaccuracies on the form. Once the form is correct and can be certified, the vendor shall certify as to the accuracy of the invoice in the online My Portal system.
  - a. Consortium contact for issues related to invoicing is its third-party consultant, Community Hospital Corporation. Consultant can be reached via email at [chctelecom@communityhospitalcorp.com](mailto:chctelecom@communityhospitalcorp.com) or phone at (972) 943-1226.
4. Vendor shall provide credit to Consortium within 90 days of disbursement from USAC.

## 6. Implementation Schedule Description

Vendors should include a plan with timeline that provides a clear understanding of the vendor’s capacity to implement the solution after a Service/Purchase Order has been signed. Additionally, please identify any circumstances that may create potential delays. Meeting healthcare provider mission critical timing requirements will be one of the proposal evaluation criteria.

## 7. Business Requirements

Responding vendors must complete *Exhibit B - Service Costs*, included in the RFP, as this will be one of the evaluation criteria. Vendors must complete each requirement and must provide sufficient information, when appropriate, to be responsive to the requirement. Any bids submitted in response to this RFP without the required attachment may, within Consortium's sole discretion, disqualify the Eligible Vendor.

## 8. Contracting Provisions

Consortium requires that Vendors allow site and service substitutions in accordance with the Order (47 C.F.R. § 54.646: 746 Appendix D, 47 C.F.R. § 54.646); this provision allows the Consortium to add sites and upgrade or change service requirements throughout the length of the contract without having to re-bid. This will allow each member to expand medical services to the communities they serve. With the

help of the Consortium, healthcare providers can improve the patient experience of care, improve the health of populations, and reduce the per capita cost of healthcare. Consortium may add new HCPs to its network during the life of the contract, existing sites may move and that the contract(s) entered into as a result of this RFP will allow for said site/service substitutions. Further, Consortium may need to upgrade or downgrade, bandwidth during the life of the contract and that the contract(s) entered into as a result of this RFP will allow for any bandwidth modifications that are required for the provision of healthcare for existing HCPs or any new HCP that may join Consortium during the life of the contract. As such, Consortium may need to upgrade or downgrade equipment for existing HCPs or purchase new equipment for new locations during the life of the contract. Any conduit required from the nearest "handhold" to the HCP facility is intended to be covered by the site and service substitution provision of the Healthcare Connect Fund. Any required conduit must be identified for any new or upgraded circuits as early in the installation process as possible and the service provider must contract directly with local contractors to provision the required conduit.

Vendors are to describe the scalability of the proposed bandwidth service or equipment, specifically:

1. How the service (broadband) can be extended to new locations added by the consortium at a later date;
2. How the service can be extended to any changes in physical location by any consortium member at a later date, including any necessary conduit; and,
3. How bandwidth speed can be upgraded (or downgraded) for any participating member of the consortium. This should be accomplished without purchasing new equipment (i.e. no "fork-lift" upgrades). The consortiums preference is the ability to increase or decrease bandwidth via a change in the software configuration without having to install or remove any hardware modules.

Consortium understands that it is not possible for a bidder to predict the future. Specifically, existing service offerings may not be available in the third year of a contract term. Consortium acknowledges that new services requested during the life of the contract, which were not originally priced through this RFP, will require the chosen vendor to provide new product information and pricing. Vendors should outline the process utilized by the vendor to request new service, how pricing will be determined, and implementation of the new service. A sample of a service order, or other form used to request new service, should be provided in the bid response. Vendors are hereby notified that any service provided must be coterminous to the original contract that is entered into as a result of this RFP.

The Healthcare Connect Fund provides an opportunity for HCPs to receive a significant subsidy relating to a wide range of telecommunications products and services. However, the rules of the program demand that consortia, participating member HCPs, and vendors adapt their standard processes and contracts to effectively take advantage of this opportunity. Based on the Consortium's review of the Healthcare Connect Fund Order and associated FAQs, we intend to require that vendors comply with the following contracting provisions:

1. To warrant consideration for an award of contract resulting from this RFP, proposers must agree to participation in the FCC Healthcare Connect Fund (HCF) as administered by the Universal Service Administrative Company (USAC) mechanism as provided for and authorized under the federal Telecommunications Act of 1996 (Reference 47 U.S.C. § 254, "Universal Service").
2. Any successful bidder is required to have a current 498 Filer ID (fka Service Provider Identification Number (SPIN)) as required by the Healthcare Connect Fund rules and regulations. A 498 Filer ID may be obtained by contacting the Universal Service Administrative Company. Vendors are also required to have an active Federal Communications Commission (FCC) Registration Number.
3. Vendors acknowledge that any contractual relationship resulting from this solicitation of proposals may be partially or entirely dependent upon the successful receipt of HCF subsidies.
4. Consortium is not responsible for any costs incurred by a vendor related to the preparation or delivery of the proposal, or any other activities carried out by the vendor as it relates to this RFP. Changes in applicable laws and rules may affect the award process or any resulting contracts. Vendors are responsible for ascertaining pertinent legal requirements and restrictions.

5. Vendors will be required to incorporate contract language that guarantees the vendor will comply with all current and future requirements of the Healthcare Connect Fund.
6. Vendors will be required to incorporate contract language that guarantees the vendor will comply with Consortiums billing and disbursement requirements.
7. If existing vendor's current rates are deemed to be the most "cost effective," the existing vendor's solutions may be selected with whatever contract modifications are required to meet the new circumstances and HCF rules. Alternatively, existing contracts that were bid through the traditional program may be "Evergreen."
8. Any contract issued as a result of this RFP will be required to contain provisions permitting the addition of new sites, upgrading services and adding additional services.
9. Consortium wishes to maximize the opportunity to "Evergreen" contracts that result from this RFP. According to HCF FAQ language, "A new contract entered into by an HCP or consortium as a result of competitive bidding will be designated as evergreen if it meets all of the following requirements: (1) signed by the individual HCP or consortium lead entity; (2) specifies the service type, bandwidth and quantity; (3) specifies the term of the contract; (4) specifies the cost of services to be provided; and (5) includes the physical addresses or other identifying information of the HCPs purchasing from the contract."
10. Vendors will be asked to incorporate contract language that allows Consortium to voluntarily extend their contracts for as outlined in this RFP since HCF rules allow such extensions to be executed without the need for a new competitive bidding process.
11. Another contracting consideration relates to the maximum three-year length of an HCF funding commitment. Even though it is anticipated that the HCF will fund services for contracts resulting from this RFP for beyond the initial commitment, it is important for Consortium and participant HCPs that cannot risk losing the subsidy to structure contracts in a way that does not commit them beyond a three-year period.
12. All contracts issued as a result of this RFP will be between the vendor and Consortium.
13. All contracts issued as a result of this RFP must include a covenant not to charge any termination fees for any services being replaced or upgraded by a Service Request included in this RFP.
14. Additional contract terms, including any required by participating HCPs, will be discussed and negotiated with selected vendors.
15. Consortium requires that Vendors allow site and service substitutions in accordance with the Order (47 C.F.R. § 54.646: 746 Appendix D, 47 C.F.R. § 54.646); this provision allows the Consortium to add sites and upgrade or change service requirements throughout the length of the contract without having to re-bid. This will allow each member to expand medical services to the communities they serve. With the help of the Consortium, healthcare providers can improve the patient experience of care, improve the health of populations, and reduce the per capita cost of healthcare.
